

# Someone taught you to read.

## It's time to repay the favor.

***36 million adults in America can't read. They need your help.***

Overall funding for literacy programs has dropped. We only have enough resources to help 3 million people. If you think low literacy doesn't affect you, think again. When adults learn how to read and write, they are more likely to help lower health care costs, find and keep sustainable employment, and contribute to their local economy.

ProLiteracy is a national nonprofit that promotes adult literacy through development of content, programs, and advocacy through our 1,000 member programs across the country. Please help someone else learn how to read.
